

COURSE DESCRIPTION – ACADEMIC YEAR 2020/2021

| | |
|----------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Course title | Decision Making and Support Systems |
| Course code | 73026 |
| Scientific sector | INF/01 |
| Degree | Master in Computational Data Science (LM-18) |
| Semester | 1 |
| Year | 2 |
| Credits | 6 |
| Modular | No |
| Total lecturing hours | 40 |
| Total lab hours | 20 |
| Attendance | <p>Attendance is not compulsory. Non-attending students have to contact the lecturer at the start of the course to agree on the modalities of the independent study.</p> <p>The exam modalities for non-attending students are indicated below, in the fields "Assessment" and "Evaluation criteria and criteria for awarding marks".</p> |
| Prerequisites | |
| Course page | https://ole.unibz.it/ |
| Specific educational objectives | <p>The course belongs to the type "caratterizzanti – discipline informatiche" in the curricula "Data Analytics" and "Data Management".</p> <p>The course gives a general overview of topics in decision theory. After this course the students will have acquired general and pluri-disciplinary knowledge about decision. The students will be more prepared when facing situations of decision making. They will also have a grasp on the technical aspects of decision making, and will be capable to apply them to provide decision support.</p> |
| Lecturer | Nicolas Troquard |
| Contact | POS 3.02, nicolas.troquard@unibz.it |
| Scientific sector of lecturer | ING-INF/05 |
| Teaching language | English |
| Office hours | Arrange beforehand by email. |
| Lecturing Assistant (if any) | -- |
| Contact LA | -- |
| Office hours LA | -- |
| List of topics | <ul style="list-style-type: none"> ● Modelling decisions ● Modelling uncertainty ● Modelling preferences ● Modelling negotiations ● Decision support tools ● Psychology of decision making ● Persuasion |

| | |
|------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Teaching format | Frontal lectures, practice and exercise classes. |
| Learning outcomes | <p>Knowledge and understanding:</p> <ul style="list-style-type: none"> • D1.5 - Knowledge of principles and models for the representation, management and processing of complex and heterogeneous data <p>Applying knowledge and understanding:</p> <ul style="list-style-type: none"> • D2.2 - Ability to address and solve a problem using scientific methods • D2.11 - Ability to develop intelligent software systems for decision support <p>Making judgments</p> <ul style="list-style-type: none"> • D3.2 - Ability to autonomously select the documentation (in the form of books, web, magazines, etc.) needed to keep up to date in a given sector • D3.3 - Ability to identify reasonable work goals and estimate the resources needed to achieve these goals <p>Communication skills</p> <ul style="list-style-type: none"> • D4.1 - Ability to use English at an advanced level with particular reference to disciplinary terminology <p>Learning skills</p> <ul style="list-style-type: none"> • D5.2 - Ability to autonomously keep oneself up to date with the developments of the most important areas of data science |
| Assessment | <p>Written exam with verification questions.</p> <p>Exercise, lab work, or project possibly done in groups, and requiring individual reports and/or presentations.</p> <p>The assessment modalities for non-attending students is identical.</p> |
| Assessment language | English |
| Assessment Typology | Monocratic |
| Evaluation criteria and criteria for awarding marks | <p>Assessment 1: 40% of the final grade will be awarded for the project, exercise, and lab work.</p> <p>Assessment 2: 60% of the final grade will be awarded for the final exam.</p> <p>Admission is awarded when the final grade is 60% or above.</p> <p>Relevant for assessment 1: ability to summarize, evaluate, and establish relationships between topics; ability to work in a team; creativity; skills in critical thinking; correctness and clarity of answers.</p> <p>Relevant for assessment 2: correctness and clarity of answers.</p> <p>The assessment modalities for non-attending students is identical.</p> |
| Required readings | There is no single textbook that covers the entire course. The course material is collected from various textbooks and research papers. |

| | |
|-------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | <ul style="list-style-type: none"> • Daniel Kahneman - Thinking, Fast and Slow • Martin Peterson - An Introduction to Decision Theory • Yoav Shoham, Kevin Leyton-Brown - Multiagent Systems: Algorithmic, Game-Theoretic, and Logical Foundations • Max H. Bazerman, Don A. Moore - Judgment in Managerial Decision Making • Efraim Turban, Jay E. Aronson - Decision Support Systems and Intelligent Systems <p>Subject Librarian: David Gebhardi, David.Gebhardi@unibz.it</p> |
| Supplementary readings | -- |
| Software used | Various tools and programming languages may be used during the course. |
