

## Syllabus

### Course description

<b>Course title</b>	<b>APPLIED STATISTICS FOR ACCOUNTING AND FINANCE</b>
<b>Course code</b>	<b>25408</b>
<b>Scientific sector</b>	SECS-S/01
<b>Degree</b>	Master in Accounting and Finance
<b>Semester and academic year</b>	1 <sup>st</sup> semester 2022/2023
<b>Year</b>	1
<b>Credits</b>	6
<b>Modular</b>	No

<b>Total lecturing hours</b>	36
<b>Total lab hours</b>	-
<b>Total exercise hours</b>	-
<b>Attendance</b>	Strongly suggested, but not required
<b>Prerequisites</b>	The pre-requisite for this course is a bachelor-level introductory course in statistics.
<b>Course page</b>	<a href="https://www.unibz.it/lauree/laurea-magistrale-in-accounting-e-finanza">Laurea magistrale in Accounting e Finanza / Libera Università di Bolzano (unibz.it)</a>

<b>Specific educational objectives</b>	The course provides the fundamentals of probability and statistics with applications in business and finance. After a review of descriptive statistics and exploratory data analysis, the course will focus on basic probability theory (random variables and common distributions) and statistical inference (point estimation, interval estimation and hypothesis testing). The second part of the course is devoted to the regression model and panel data analysis. The methods will be illustrated by using the R statistical computing environment.
--	---

<b>Lecturer</b>	Dr. Greta Goracci greta.goracci@unibz.it
<b>Scientific sector of the lecturer</b>	SECS-S/01
<b>Teaching language</b>	English

<b>Learning outcomes</b>	<p>Knowledge and understanding:</p> <ul style="list-style-type: none"> <li>● Acquire knowledge and understanding of statistical methods related to common types of financial and business data.</li> </ul> <p>Applying knowledge and understanding:</p> <ul style="list-style-type: none"> <li>● Manipulate and summarize the data;</li> <li>● Apply statistical methods to real financial data sets using statistical software.</li> <li>● Interpret the results of the analyses in the context of common finance and business problems.</li> </ul> <p>Making judgments</p> <ul style="list-style-type: none"> <li>● Think critically and make effective decisions based on appropriate statistical analyses.</li> </ul> <p>Communication skills</p> <ul style="list-style-type: none"> <li>● Communicate effectively the results from statistical analyses, even to a non-specialised audience.</li> </ul>
<b>Assessment</b>	<p>Final-term exam and mid-term exam (optional)</p> <p>The written examinations are composed of several exercises and review questions. They assess the understanding of the theoretical concepts introduced during the course and the student's ability to apply the methods to real datasets and to interpret the results.</p>
<b>Assessment language</b>	<p>English</p>
<b>Evaluation criteria and criteria for awarding marks</b>	<p>Final-term exam: score up to 15 Mid-term exam: score up to 15</p> <p>The final mark is the sum of the marks of the two exams</p> <p>For students without the mid-term exam: Complete final exam: score up to 30</p>
<b>Required readings</b>	<p>Main textbook:</p> <p>Ross, S. <u>Introduction to Probability and Statistics for Engineers and Scientists</u>. 6th Ed. 2020, Academic press, <b>ISBN: 9780128243466</b>.</p>
<b>Supplementary material</b>	<p>Additional reference textbooks on statistical methods and statistical computing for financial data are:</p> <p>Lee, C. F., Lee, J. C., &amp; Lee, A. C. <i>Statistics for Business and Financial Economics</i>. Springer, 2013.</p>
