

07.12.2017 13:45 ROOM D1.02

Eye tracking and biometric systems: breaking into industrial engineering

13:45	Welcome speech Prof. Dominik Matt, Free University of Bozen-Bolzano, Faculty of Science and Technology
14:00	Introduction and motivations of the seminar Yuri Borgiaanni, Free University of Bozen-Bolzano, Faculty of Science and Technology
14:15	When are studies with biometric devices worth? The psychology standpoint Prof. Demis Basso, Free University of Bozen-Bolzano, Faculty of Education
14:45	Eye tracking: ongoing developments and successful applications Iyad Aldaqre, SR Labs, Milan
15:15	Emotions in South Tyrol: results from the tourism field Anna Scuttari, EURAC Research, Bolzano
15:45	Break
16:00	3D Face analysis in industrial engineering: studies and perspectives Prof. Enrico Vezzetti, Politecnico di Torino, Department of Management and Production Engineering
16:30	User experience and human factors as a fundamental driver for designers Prof. Kristin Paetzold, Universität der Bundeswehr, Institute for Technical Product Development, Munich
17:00	Roundtable
17:30	Conclusions and outlook Erwin Rauch, Free University of Bozen-Bolzano, Faculty of Science and Technology

To follow

- Kick-off meeting of the project "EYE-TRACK", funded by the Free University of Bozen-Bolzano (in Italian/German)
- Buffet for participants

During the seminar: Possibility of testing eye tracking devices – offered and managed by SR Labs

Organizers: Yuri Borgiaanni, Erwin Rauch
