During the multiplier event, the Erasmus+ project “**ITM: Inclusive Teaching Material. A European Comparison of Teaching Material – Criteria for Its Development and Evaluation**” will be presented. The fundament of the project is an international study, which collects and compares inclusive teaching materials as well as assessment criteria with a focus on primary education in the countries of the project partners Germany, Italy, Sweden and Luxembourg. The participants will be introduced to the topic in order to exchange with Italian national experts and experts from the project partner of the countries mentioned and to discuss the project results in an international dialog.
