Project description and specific educational objectives	<p>The course belongs to the class "caratterizzante" (module 1 and module 2) and "di base" (3) in the curriculum in Design.</p> <p>PROJECT DESCRIPTION Course description module 1 – Visual Communication:</p> <p>The project deals with the requirements of and expectations towards graphic identities for institutions, companies and, in this case, cities. What features characterize 'corporate design'? In which sense does brand development and branding differentiate from it? What are the visual criteria for the development of trademarks? How is an image style determined? A 'visual identity' design aims to express the significance and the image of an institution, thus making it recognizable in different media. This requires a graphic translation, which strives to be simple as well as adaptable. The relevance of the visual</p>

	<p>outcome is determined by the amount of flexibility attained despite the required uniformity</p> <p>In the studio we will deal with different aspects of corporate design dealing with realistic and applicable tasks. Accompanied by thematic introductions and workshops, each participant develops a suitable idea conceptionally and visually to the presentation stage.</p> <p>The course is designed for acquiring professional skills and knowledge.</p> <p><i>Educational objectives Module 1 – Visual Communication:</i></p> <ul style="list-style-type: none">• the acquisition of a design methodology in the field of visual communication• the development of an independent and rigorous study pathway• the acquisition of the essential basic knowledge to be able to carry out a project in the field of visual communication• the acquisition of a design methodology in the field of product design and visual communication• the acquisition of the knowledge and understanding of design processes for corporate image and corporate design• the acquisition of the knowledge and understanding of design processes for advertising• the acquisition of the basic knowledge concerning the culture of design in all its aspects• the acquisition of the basic knowledge concerning the culture of design in all its aspects <p><i>Course description module 2 – Interactive & Motion Graphics:</i></p> <p>A series of lectures and exercises with themes and topics directly related to the main subject of the project "Das Bild der Stadt"; we will research and make critical investigations, develop concepts and discover the principles and elements of graphic design for making storytelling and basic visual journalism to achieve the project results. Furthermore, the course will examine the correspondence between the importance of a graphic culture connected to contemporary graphic, covering aspects of visual storytelling, type setting, use of analogue and digital technology and old and new ways of communication.</p>
--	--

	<p><i>Educational objectives module 2 – Interactive & Motion Graphics:</i></p> <p>the acquisition of the essential basic knowledge to be able to carry out a project in the field of visual communication</p> <ul style="list-style-type: none">• to have the ability to finalise the implementation of a project undertaken in the field of visual communication with the basic knowledge acquired in the technical and scientific subjects• the acquisition of the basic knowledge concerning the culture of design in all its aspects• know how to analyse, design and develop projects in visual communication and with traditional graphics• know how to develop and carry out the technical aspects of visual communication and graphic design which are both traditional (analogical) and multimedia (typography, lettering, type setting, layout, illustration techniques, information design, photography, imaging and photo retouching) <p><i>Course description module 3 – Theories and Languages of Visual Communication:</i></p> <p>The course gives a general overview of scientific contents concerning research methods for design students in relation to the topic of the project and to the so called “narratology and storytelling”.</p> <p>Description: working title: “hidden stories of Bolzano” Administrative institutions of all cities and the majority of larger municipalities communicate their image of the city / municipality in different media. Amongst the cities there is a competition for new inhabitants, tourists and companies, because all this people are able to increase and secure the income of the cities in a direct and indirect way. The more attractive a city is, the higher is the income of the administration of the city. For this reason, advertising and marketing studios use all possibilities, means of communication and different ways to communicate to present the optimum image of the city. The core business or philosophy of this marketing concepts are the keywords “identity” and “authenticity”. The authentic is direct, unadulterated and unique, and the inhabitants of the cities should identify themselves with this specific and collective attributes. To identify means to accept and acknowledge. The person who identifies himself with his city participates in the live of the city and contributes to a positive development of the urban community.</p>
--	--

	<p>The authentic is a sum of different values and stories , which are partly evident to "read" but often hidden under or behind the everyday live of all the citizens. To find this stories and values is possible, if we observe carefully, if we observe with other means than the normal ones and if we dig out the hidden stories and histories of the city. For this reson, we will go on the search for the mysterious stories of the city of Bolzano and we will research the surfaces and the deeper historical, human and aesthetic layers with the aim to spread out materials that looks on the first glance like broken pieces and fragments. We will use all well tested and new methods / procedures too, which are available for design students. There are no restrictions and requirements in relation to methods and used media to give large space to the implausibility and unimaginability. The second phase of the course consists of a scientific and designerly analysis of the fragments and traces with the target to write narrations which in the thirs phase can create new identities. Whether new identities can be adapted to the jet existing of the image of the city or if there is a chance to "write" and create a new big story of Bolzano is of course in the beginning of the course completely open.</p> <p><i>Educational objectives Module 3 – Theories and Languages of Visual Communication:</i></p> <ul style="list-style-type: none"> • the acquisition of a design methodology in the field of visual communication • the acquisition of the basic knowledge so as to be able to look critically at their own work and to deal with the complexities of contemporary society • the acquisition of the basic knowledge concerning theories and languages of visual communication, artistic research and narratology • the acquisition of basic skills to write essays • the acquisition of the basic knowledge concerning the culture of design in all its aspects

Learning outcomes	Learning outcomes for Module 1 – Visual Communication:
--------------------------	---

- to have the ability to design, develop and implement a project in the field of visual communication
- design, develop and implement a project in the field of visual communication
- know how to analyze, design and develop projects in visual communication with traditional (analogical) graphics
- knowledge of the technical and scientific aspects of the design of corporate identity
- knowledge of the technical and scientific aspects of graphic design for advertising
- present at a professional level their own project realized in the field of visual communication in the form of an installation, both oral and written
- communicate at a professional level and argue the reasons for their choices and justify them from a formal, technical point of view

Learning outcomes for module 2 – Interactive & Motion Graphics:

Knowledge and understanding

The students will able to :

- know the basic techniques and the basic methods of graphic design.
- recognize and understand qualities of works in the field of brand design and visual story telling
- use the methods and techniques of graphic design for printing.
- knows how to use the elements of visual communication like the colors, the typography, the charts, the use of the shapes, etc.
- recognize and understand the visual language of graphics design

Learning outcomes for module 3 – Theories and Languages of Visual Communication:

- To have the ability to finalize the implementation of a project undertaken in the field of visual communication with the basic knowledge acquired in the theory and semiology of visual communication
- to have the ability to grasp the main phenomena that characterize today's society and to know how to look at these critically, also from a social and ethical perspective, and to develop appropriate solutions in terms of the proposal / response of the project
- knowledge of the historical and theoretical

	<p>foundations of design</p> <ul style="list-style-type: none"> • knowledge of the important sociological, semiotic and anthropological aspects • know how to present critical and planning analysis orally • know how to present written critical and planning analysis • know how to apply the research methods and results in the project to the various areas of the project itself • develop a good independent judgment, both in the critical evaluation of their work and in the ability to use the appropriate interpretive tools with respect to the contexts where they are going to apply their own design practice and / or to continue their studies, assessing also the social and ethical aspects • communicate at a professional level and argue the reasons for their choices and justify them from a theoretical point of view

Assessment	<p><i>Assessment details for Module 1 – Visual Communication:</i></p> <p>— Final Presentation/Colloquium: The 10-minute public presentation covers the detailed explanation and verbal illustration of the final project. Furthermore, it analyzes the task and the process of the project from start to finish, defines the aims to be communicated and gives the reasons for the concepts and the final project.</p> <p>— Documentation: The documentation consists of three parts, to be fulfilled with the exam. A sketchbook (physical) documenting the design process; a 12-page leporello (physical) containing research, design (images of prototypes) and strategy. Thirdly a complete documentation of texts, data and high-resolution images onto the project server of the university.</p> <p>— Final project/final project-prototypes: The individually prepared design of all tasks treated in the project. Generally the prototypes include: brand-icon and name, tagline/slogan, color-scheme, typography/font, visual language/imagery and applications in form of an image-poster (scale 1 : 1), stationary (scale 1 : 1), programmeflyer (scale 1 : 1), image trailer (30–120s) and a prototype of the website</p> <p><i>Assessment details for module 2 – Interactive & Motion Graphics:</i></p> <p>presentation and discussion of the own work:</p> <ul style="list-style-type: none"> • originality
-------------------	---

	<ul style="list-style-type: none">• coherence• technical qualities for the presentation• clarity• influencing skills for the process throughout the semester:• individual development• active participation and quality of its contributions• proper use of tools and new skills <p><i>Assessment details for module 3 – Theories and Languages of Visual Communication:</i></p> <p>Permanent presence in class is not compulsory but the class can only then successfully be completed, if students are willing to participate especially in the first four to six weeks in doing intense medial, archival and experimental field trips in the city of Bolzano. It is necessary to handle (or to learn to handle) technical media and analogous methods to document the research processes and results and the will to transform the visual and audio research material into written forms.</p> <p>It is compulsory to develop a detailed map and archive of the individual design / artistic research process, to complete this process during the semester, to develop the concept of story telling and narratology in relation to the individual fields of research and to adapt this concept to the requirements of module 1. It is compulsory to write a series of stories, scientific documentation and a final new story of Bolzano, related to the individual concepts.</p>
Assessment language	The same as the teaching language
Evaluation criteria and criteria for awarding marks	<p><i>The evaluation of the single modules does not result in three separate marks, but will add up to the overall project evaluation. There is only one final overall mark for the project which is agreed by the three professors, who evaluate the project according to the following criteria:</i></p> <p><i>Evaluation criteria and criteria for awarding marks for Module 1 – Visual Communication:</i></p> <ul style="list-style-type: none">— (10 % of the final grade) Presentation/Colloquium: Clarity of the presentation and argumentation, vividness of the presentation tools, answering of questions— (20 % of the final grade) Documentation: Clarity and design quality of the documentation through text, image, illustration and/or video— (70 % of the final grade) Final project/final project-prototypes/documentation: Clarity of the analysis and concept on the basis of

	<p>prerequisites and research; level of the design quality of the project outcomes in relation to their complexity, originality, technical execution and the semester in which the project has been realized.</p> <p>Evaluation criteria and criteria for awarding marks for module 2 – Interactive & Motion Graphics:</p> <ul style="list-style-type: none">• for the own work:• originality• appropriateness• formal aesthetic quality• technical quality• for the presentation:• clarity• convincingness• for the process during the whole semester• quality of team dynamics and individual role in it• individual development• active participation and quality of contributions• correct use of the tools and new competences <p>Evaluation criteria and criteria for awarding marks for module 3 – Theories and Languages of Visual Communication:</p> <p>for the part of the research: (40% of the final mark)</p> <ul style="list-style-type: none">- innovative design research methods- a professional and logical arrangement and analysis of the material outcome <p>for the use of the media: (40% of the final mark)</p> <ul style="list-style-type: none">- professional effort of appropriate techniques- ability to use the language of the different media- ability to criticise the individual medial results- ability to use the language of the media in a correct and creative way <p>for the presentation and results: (20% of the final mark)</p> <ul style="list-style-type: none">- technical quality, appropriate to design in a professional manner- traceability of the concepts- logical form and objectiveness of the arguments
