Specific educational objectives	The course refers to the typical educational activities and belongs to the scientific area of Business Administration.
	The main objective of the course is to provide a general overview of scientific content in the area of general management. The course is divided in two parts. The first part focuses on the scientific notions related with general management covering the main functions of management such as planning, organizing and controlling, and specific topics like managerial decision-making and quality management. The second part of the course introduces concepts and techniques related to operations management with special attention to service organizations. In the end of the course students should be able to understand different approaches to management and reflect on their own management style. Students should also understand principles of operations management and be able to apply them empirically.

Assessment	 management theories with respect to the current situation of the firm <u>Communication skills</u> in the ability to discuss situations relevant for management in a precise and coherent way <u>Learning skills</u> through acquisition of basic notions of general management and instruments and models of managerial decision-making Written exam consists of some true-false questions in order to evaluate understanding of basic notions covered in the course; some exercises evaluating understanding of managerial theories; some open questions evaluating capacity to express independent judgment with respect to a managerial situation During the course students can choose to conduct a voluntary group project related to the analysis of service operation. Written project report should be submitted within the end of the course and substitutes part of the written exam. There is no difference between exams of attending and non-attending students.
Assessment language	English
Evaluation criteria and criteria for awarding marks	Written project report counts for 25% of final grade, in this case written final exam counts for 75% of the final grade. For students who choose not to conduct a project written final exam counts for 100% of the final grade. The assessment of the project report is based on the clarity of problem definition, relevance of collected data with respect to the defined problem, quality of problem analysis, quality of provided solutions for the problem The assessment of written exam bases on the clarity of answers and relevance with respect to the question, ability to base own opinion on acquired knowledge and critical thinking, ability to structure response into concise and clear way.
