Lecturing assistant	TBA
Teaching assistant	TBA
List of topics covered	<p>This course integrates advanced managerial accounting and control topics with recent techniques of financial management and strategic analysis. It focuses on preparing, evaluating and interpreting financial and non-financial information for managerial decision-making and control in different types of organizations (manufacturing and service companies; for-profit and not-for-profit).</p> <p>Topics covered include advanced cost allocation techniques (like Time-Driven Activity-Based Costing), evaluation of financial information to support project appraisal, pricing strategies, Balanced Scorecard and Strategic Maps, as well as the latest techniques for customer profitability analysis and customer valuation. The course also covers fundamentals of managerial performance evaluation and incentive systems.</p>
Teaching format	<p>The course combines in-class explanation of the background material, problem-solving and case discussions. Presentations and interactive discussions are the main teaching methods used in this course.</p> <p>Students are expected to participate actively in class work, which will give them the opportunity to apply theoretical concepts to realistic business-related situations. In order to benefit from this approach, it is important that students come to class fully prepared.</p>
Learning outcomes	<p>Knowledge and understanding:</p> <ul style="list-style-type: none"> • Advanced knowledge and understanding of managerial dilemma's related to the measurement and management of performance in different types of organizations • Knowledge and understanding of the functional and dysfunctional effects of internal financial and non-financial information on the behaviour of managers <p>Applying knowledge and understanding:</p> <ul style="list-style-type: none"> • Ability to apply advanced management accounting concepts and techniques in several business settings • Ability to integrate financial information with non-financial information to effectively support managerial decision-making and drive/control corporate performance <p>Making judgments</p> <ul style="list-style-type: none"> • Ability to search for, evaluate and suggest appropriate analytical frameworks to diagnose and solve multifaceted managerial problems • Ability to analyse complex business settings and apply appropriate problem solving, computational and communication skills • Preparation and analysis of managerial reports that aid in measuring/driving corporate performance and evaluating managerial performance <p>Learning skills</p> <ul style="list-style-type: none"> • Ability to present in oral and written form an analysis of business solutions in response to specific issues related to the measurement and management of corporate and managerial performance

Assessment	<p>Final Exam (60%): The final exam is a combination of problems and essay questions.</p> <p>Solution/presentation of case studies (40%): Case studies will be assigned during the semester to be completed in writing a business report or PPT slides and presented in class by groups of students.</p> <p>The Final Exam’s objective is to assess how well students understand the material covered throughout the course (comprehension) and the interconnections (integration) among the various topics.</p> <p>The case studies measure the student’s ability to search for the relevant economic information that apply to a specific business problem, stimulate them to analyse the problem and provide managerial recommendations to address it. Presentations in class allow the discussion of the solutions suggested in an interactive way.</p>
Assessment language	English
Evaluation criteria and criteria for awarding marks	<p>Non-attending students: Final exam: 100%</p> <p>Attending students: Final exam: 60% Case studies to be handed in/presented in class: 40%</p> <p>Students must pass the exam to have a passing grade in the course.</p>
Required readings	TBA
