**Specific educational objectives**

The course belongs to the type "caratterizzanti – discipline informatiche" in the curricula "Data Analytics" and "Data Management".

The Agile Software Development course intends to instill into future software engineers an agile mentality, and to improve their capabilities of working on software development projects in an agile manner. The main educational objectives are:

- Understanding the root and essence of agile software development and different agile approaches
- Applying key agile engineering and project management practices in software development projects
- Improving teamwork using agile approaches
- Scaling agile software development beyond agile home ground, including distributed and large software development projects.

**Lecturer**

Xiaofeng Wang

**Contact**

POS 3.11, xiaofeng.wang@unibz.it, +39 0471 016181

**Scientific sector of lecturer**

INF/01

**Teaching language**

English

**Office hours**

During the lecture time span, Fridays 15:00 - 17:00, arrange beforehand by email.

**Lecturing Assistant (if any)**

--

**Contact LA**

--

**Office hours LA**

--

**List of topics**

- Software crisis and the origin of the agile software movement
- Different agile software development approaches and key agile practices
- From time-boxed agile methods to continuous flow: lean software development
- Continuous experimentation and continuous software engineering
Teamwork in agile software development
Scaling agile: distributed and/or large software development projects using agile methods

Teaching format
Frontal lectures and team projects

Learning outcomes
Applying knowledge and understanding:
- D2.4 - Ability to develop programmes and use tools for the analysis and management of data and related infrastructures
Making judgments
- D3.1 - Ability to plan and, if necessary, re-plan a technical project activity for the analysis and management of data, or for the implementation of corresponding software systems or applications, and to complete it within the defined deadlines
- D3.2 - Ability to autonomously select the documentation (in the form of books, web, magazines, etc.) needed to keep up to date in a given sector
- D3.3 - Ability to identify reasonable work goals and estimate the resources needed to achieve these goals
Communication skills
- D4.1 - Ability to use English at an advanced level with particular reference to disciplinary terminology
- D4.5 - Ability to interact and collaborate in the implementation of a project or research with peers and experts
Learning skills
- D5.3 - Ability to deal with problems in a systematic and creative way and to acquire problem solving techniques

Assessment
Exam type for regularly attending students:
- Project work and oral exam:
  - Project work to apply agile practices in a software development project (70% of the mark, team);
  - Oral exam to test the understanding of theories and knowledge application skills, and verification of project results (30% of the mark, individual).

  Note: Positive project result is necessary to attend the oral exam. Both parts of results must be positive to pass the exam.

  In case of a positive mark, the project will count for all 3 regular exam sessions.

Exam type for non-attending students:
- Written report and oral exam:
  - Written report on a piece of research related to agile software development (agreed upon with the lecturer at the beginning of the course) (70% of the mark);
  - Oral exam to test the understanding of theories and verification of written report (30% of the mark).

  Note: Positive written result is necessary to attend the oral exam. Both parts of results must be positive to pass the exam.
In case of a positive mark, the written result will count for all 3 regular exam sessions.

### Evaluation criteria and criteria for awarding marks

For regularly attending students:
- Evaluation criteria for project work:
  - effective application of agile practices
  - good teamwork
  - quality of developed solution
- Evaluation criteria for oral exam:
  - ability to summarize, evaluate, and make connections between various topics
  - clarity of answers

For non-attending students:
- Evaluation criteria for written report:
  - good understanding of the literature
  - clarity of the research method
  - convincing research results
- Evaluation criteria for oral exam:
  - ability to summarize, evaluate, and make connections between various topics
  - clarity of answers

### Required readings

Subject Librarian: David Gebhardi, David.Gebhardi@unibz.it

### Supplementary readings

### Software used
Based on types of projects, decided by project teams
