**Specific educational objectives**
The course belongs to the type "affini o integrative – formazione affine" in the curriculum "Data Analytics".

The course is designed for acquiring professional skills and knowledge in statistical analysis of data common to different applicative domains.

The educational objectives are: 1) to introduce the students to the main concepts of probability and statistics; 2) to provide the students with the theoretical foundations, the methodologies, the practical techniques, and the software tools related to probabilistic reasoning, regression, descriptive and inferential statistics.

**Lecturer**
Paola Lecca
Piazza Domenicani 3, Room 3.11, Paola.Lecca@unibz.it, +39 0471 016162

**Scientific sector of lecturer**
INF/01

**Teaching language**
English

**Office hours**
Tuesday 10:15 - 12:15, arrange by email.

**Lecturing Assistant (if any)**
Fabiola Del Greco

**Contact LA**
Piazza Domenicani 3, Room 1.04, fabiola.delgreco@eurac.edu

**Office hours LA**
Wednesday 18:00-19:00, arrange by email.

**List of topics**
- Introduction to probability. Probability diagrams, conditional probability.
- Hypothesis testing and ANOVA
- Test of independence
- Goodness of fit tests.
- Correlation
- Linear and Logistic regression with one and multiple variables
- Time series
- Probabilistic models (EM)
### Teaching format
Frontal lectures, theoretical exercises and exercises on computer with software R.

### Learning outcomes
**Knowledge and understanding:**
- D1.1 - Knowledge of the key concepts and technologies of data science disciplines
- D1.8 - Knowledge of the mathematical-statistical principles required for data analysis

**Applying knowledge and understanding:**
- D2.1 - Practical application and evaluation of tools and techniques in the field of data science
- D2.2 - Ability to address and solve a problem using scientific methods
- D2.7 - Practical application of mathematical-statistical tools and methods from the field of data science

**Making judgments**
- D3.2 - Ability to autonomously select the documentation (in the form of books, web, magazines, etc.) needed to keep up to date in a given sector

**Communication skills**
- D4.1 - Ability to use English at an advanced level with particular reference to disciplinary terminology

**Learning skills**
- D5.3 - Ability to deal with problems in a systematic and creative way and to appropriate problem solving techniques.

### Assessment
This course foresees a PASS/FAIL exam. Assessment: written exam both for attending and non-attending students.

### Assessment language
English

### Assessment Typology
Monocratic

### Evaluation criteria and criteria for awarding marks
This course foresees a PASS/FAIL exam. Assessment: written exam both for attending and non-attending students.

The written exam is evaluated with a score expressed in thirtieths. The minimum threshold for passing the exam is 18/30.

Example: The exam will consists of a set of exercises and questions whose scores sum to 30/30. The correct solution as well as the correct answer to a question score positively, whereas wrong solutions of exercise score zero, and wrong answer to question score negatively.

### Required readings
Text books:  

Reading suggestions:
Subject Librarian: David Gebhardi, David.Gebhardi@unibz.it

<table>
