

COURSE DESCRIPTION – ACADEMIC YEAR 2020/2021

Course title	Engineering of Mobile Systems	
Course code	76416	
Scientific sector	INF/01	
Degree	Bachelor in Informatics and Management of Digital Business (L-31)	
Semester	2	
Year	2	
Credits	6	
Modular	No	
Total lecturing hours	40	
Total lab hours	20	
Attendance	Attendance is not compulsory, but is highly recommended, as practical exercises will be done during labs and lectures.	
Prerequisites		
Course page	https://ole.unibz.it/	
Specific educational objectives	The course belongs to the type "caratterizzante - informatica".	
	Students will learn the key concepts of mobile application development and the internet of things. Practical experience will be gained by using state of the art technologies for the development of mobile applications. Upon completion of the course, students shall have acquired expertise in writing mobile applications that leverage advanced mobile APIs and connect to outside web services, and shall be aware of the various tradeoffs in the development of mobile applications.	
Lecturer	Romain Robbes	
Contact	Office POS 1.16, first floor, Faculty of Computer Science,	
Contact	rrobbes@unibz.it, +39 0471 016025	
Scientific sector of lecturer	INF/01	
Teaching language	English	
Office hours	By previous email appointment.	
Lecturing assistant (if any)		
Contact LA		
Office hours LA		
List of topics	Design of native mobile applications	
	Android development platform	
	iOS development platform	
	Frameworks for mobile development	
	New architectures: Arduino, Raspberry	
	Internet of Things	
Teaching format	Frontal lectures, in-class exercises, projects in the lab.	
Learning outcomes	 Knowledge and understanding: D1.11 - Know software design and development methodologies with particular regard to the mobile environment. 	

•	
	 Applying knowledge and understanding: D2.6 - Ability to design, describe and present IT solutions to policy makers. D2.8 - Ability to develop applications in the web area. Making judgments D3.4 - Ability to assess fundamental economic and business facts on the basis of numerical data. Communication skills D4.4 - Ability to structure and prepare technical documentation. Learning skills D5.3 - Ability to follow rapid technological developments and to learn about innovative aspects of the latest generation of information technology and systems.
Assessment	Written exam (50%)Project and assignments (50%)
Assessment language	English
Assessment Typology	Monocratic
Evaluation criteria and criteria for awarding marks	The students will implement a mobile application as a project. The application should include the topics covered during the lectures and labs. The outputs of the project are: • a written report describing the application (problem statement, proposed solution, application design and architecture, functionality, development problems/solutions) • a working demo of the application • a project presentation
	The goal of the project is to assess to which degree students have achieved the following learning outcomes: applying knowledge and understanding, making judgments, communication skills and ability to learn. The aim of the written exam is to assess to which degree students have achieved the learning outcomes concerning applying knowledge and understanding, making judgments, communication skills and ability to learn.
Required readings	Reading material will be provided on the course web page.

Required readings	Reading material will be provided on the course web page.
	Subject Librarian: David Gebhardi, <u>David.Gebhardi@unibz.it</u>
Supplementary readings	
Software used
