Specific educational objectives	<p>Banking and Corporate Finance is a third-year course for students attending B.Sc. in Economics and Management. The course is designed to offer an introduction to the structure and operation of financial markets and institutions, why financial crises occur, central banking and the conduct of monetary policy, the management of financial institutions and their valuation. Moreover, we will also study how firms choose their capital structure to make real investments, and how financial markets and intermediaries evaluate and finance business activities.</p> <p>Students are required to complete assignments. Every academic year we will select a topic of interest to the banking sector.</p>

List of topics covered	The main subject areas covered in the course are: Financial systems and Financial Markets, The structure and function of financial services industry, Financial markets efficiency and the effects on real economy, Firms' cost of capital and capital structure strategies, Bank lending, Capital Structure.
Teaching format	Background lectures, case study analysis (individual and small groups), case study class discussion, assignments.

Learning outcomes	<p>LEARNING OUTCOMES:</p> <p><u>Knowledge and understanding:</u></p> <ul style="list-style-type: none"> To be successful, students need to master the course core concepts and learn to identify and solve problems that today's practitioners face. Thus, the course equips students with the fundamental background to operate into the world of financial markets and financial institutions, particularly commercial banks. Students will learn how banks operate and evaluate business investments. <p><u>Applying knowledge and understanding:</u></p> <ul style="list-style-type: none"> Ability to use modern finance theory, financial models and statistical analysis to valuation of financial market transactions, firms' securities and corporate finance transactions. Understanding bank intermediaries and how they affect firms' investment and financing decisions. <p>The course combines the latest academic thinking with hands-on business practice and its main goal is that attending students should develop by the end of classroom activity an expanded ability to analyze and think about sound financial management decisions, and to defend these decisions with analytical reasoning. This course will use a combination of lectures, technical notes, outside readings, case discussions, to study Banking and Corporate finance. Class participation and active discussion is both expected and encouraged. Students are expected to have thoroughly read all the assigned material in advance of the class to ensure better understanding of the issues involved and to have meaningful class participation. Students should carefully read and be prepared to discuss all assigned readings and case studies. Case studies and supplemental readings are detailed in the course outline.</p>
--------------------------	--

Assessment	<u>Attending Students</u>
-------------------	---------------------------

	<p>Student final grade will be a mixture of: midterm and final exam (60%), assignments (30%), class participation (10%).</p> <p><u>Not Attending Students</u></p> <p>Not attending student assessment will be through final exam only, which counts as 100% of final grade.</p> <p>Midterm and final exams will have questions, either a quantitative problem or essay, in each of course building block (Financial Markets, Banking, Principles of corporate finance).</p>
Assessment language	English
Evaluation criteria and criteria for awarding marks	Final exam is a written test at PC-Lab classroom. Students are allowed access to MS-Office software and quality of written English is essential to earn the passing grade.
