concepts and instruments used on international financial markets.

Applying knowledge and understanding:
- Ability to apply the theories and techniques necessary for the analysis of international financial investments and to understand the mechanisms underlying price formation of financial assets.

Making Judgements:
- Relevant examples and applications of theories should encourage students to express their own judgments in classroom and to improve their problem-solving skills.

Communication skills:
- Discussions and debates in class are part of the lecture concept. The participation of students will be stimulated by the teaching method mixing theory with practical applications.

Learning skills:
- The course should provide the necessary foundations of international finance, thereby offering a suitable background for the attendance of any finance program at a Master level.

| Assessment | Assessment based on a final closed-book written exam (100%) |
| Assessment language | English |
| Evaluation criteria and criteria for awarding marks | The exam includes both open-ended questions and multiple-choice questions. Multiple-choice answers neither require motivations nor calculations. Open answers require short explanations and/or calculations and the marks will be awarded based on the correctness of calculations and/or how well the argumentation links to the course concepts. |
| Supplementary readings | None |
