|  | • Concepts and Applications
|  | • Analytical models for Consumer Behaviour Modelling
|  | • Prediction models for Consumer Behaviour Modelling |
| Teaching format | TBD |

Learning outcomes

- Knowledge and understanding:
  - D1.17 - Know further methods of Digital Finance and Digital Advertising and their application.
  - D.1.18 - Understand the interdisciplinary approach to IT projects that takes into account technical foundations, business needs, social and dynamic aspects and the regulatory framework.

- Applying knowledge and understanding:
  - D2.3 - Ability to analyse business problems and to develop proposals for solutions with the help of IT tools.
  - D2.4 - Ability to formalise and to analyse procedures and operational processes, to recognise and use optimisation potentials.
  - D2.6 - Ability to design, describe and present IT solutions to policy makers.
  - D2.9 - Ability to support the management of IT departments and software companies by providing information as needed.
  - D2.11 - Ability to analyse large amounts of data on economic facts and processes.
  - D2.13 - Ability to apply additional knowledge in the subjects of Digital Finance and Digital Marketing.
- **D2.18** - Know how to communicate with the client in written and oral form on a professional level in English, Italian and German.

### Making judgments
- **D3.1** - Ability to collect and interpret data useful for forming independent judgments on IT and economic aspects of information systems.
- **D3.3** - Ability to compare and evaluate different IT solutions based on their technical characteristics and key business figures.
- **D3.4** - Ability to assess fundamental economic and business facts on the basis of numerical data.

### Communication skills
- **D4.1** - Be able to use the three languages English, Italian and German and, in particular in English, be able to use appropriate technical terminology and communication style.
- **D4.2** - Ability to use modern means of communication also for remote interactions.
- **D4.3** - Ability to negotiate with people with different professional experiences the definition and requirements of corporate information systems.

### Learning skills
- **D5.2** - Learning ability to carry out strategic and IT project activities in corporate communities, also distributed.
- **D5.3** - Ability to follow rapid technological developments and to learn about innovative aspects of the latest generation of information technology and systems.

### Assessment
The assessment will be indicated by each lecturer individually. Please refer to the first week's presentation.

Non-attending students will be evaluated in a final exam, which will account for 100% of the final grade.

### Assessment language
- English (M1) and Italian (M2)

### Assessment Typology
- Monocratic

### Evaluation criteria and criteria for awarding marks
All students will have one single grade that will be determined as the arithmetical average of the grades of the different parts of the exam.

For details, please refer to the first week's presentation of each lecturer.

### Required readings
- **Module 2:** *TBD*
- Subject Librarian: David Gebhardi, David.Gebhardi@unibz.it
