**Attendance**

Attendance is not compulsory, but non-attending students are suggested to contact the lecturer at the start of the course to agree on the modalities of the independent study.

**Prerequisites**

open-minded towards innovation and new IT technology, comfortable to work with high uncertainty, and willingness to collaborate with students of different backgrounds

**Course page**

MS Teams, https://leanstartup.bz

---

**Specific educational objectives**

The course belongs to the type caratterizzanti – discipline informatiche.

Lean Startup adopts a learning-by-doing style, and is designed for acquiring both theoretical and practical skills and knowledge on processes of high-tech and software-intensive startups.

The main educational objectives are:

- Evaluating a software business idea and constructing a corresponding business model.
- Conducting customer discovery and validation.
- Experimenting iterative product releasing and validating the results.
- Learning how to operate and make decisions in chaos with insufficient data.

---

**Lecturer**

Xiaofeng Wang

**Contact LA**

Office SER-I 1.07, xiaofeng.wang@unibz.it, tel. 0471 016181

**Scientific sector of lecturer**

INF/01

**Teaching language**

English

**Office hours**

During the lecture time span, Fridays from 9:00 to 11:00, arrange beforehand by email

**Lecturing Assistant (if any)**

--

**Contact LA**

--

**Office hours LA**

--

**List of topics**

- Nature and characteristics of software startups
- Problem and solution identification and validation
- Building minimum viable products
Lean analytics and pivoting
● Continuous retrospectives for startup team learning
● Scaling software startups

**Teaching format**
Team projects supported by frontal lectures

**Learning outcomes**

**Knowledge and understanding:**
D1.3 To know in depth the scientific method of investigation applied to complex systems and innovative technologies that support information technology and its applications.

**Applying knowledge and understanding:**
D2.2 To be able to design and perform experimental analyses of information systems in order to acquire measures related to their behaviour and to evaluate experimental hypotheses in different fields of application, such as business, industrial or research;
D2.4 To be able to define an innovative technical solution to an application problem that meets technical, functional and organisational constraints and requirements.

**Making judgments:**
D3.3 To be able to define work objectives compatible with the time and resources available;
D3.4 To be able to reconcile the objectives of the project that are in conflict, to trade-off cost, resources, time, knowledge or risk;
D3.5 To be able to work with large autonomy, also assuming responsibility for projects and structures.

**Communication skills:**
D4.2 To be able to present the contents of a scientific/technical report to an audience, including non-specialists, at a fixed time;
D4.4 To be able to coordinate project teams and to identify activities to achieve project objectives;
D4.7 To be able to carry out research and projects in collaborative manner.

**Learning skills:**
D5.2 To be able to keep up to date independently with developments in the most important areas of information technology;
D5.3 In the context of a problem solving activity, to be able to extend knowledge, even if incomplete, taking into account the final objective of the project.

**Assessment**

For both attending and non-attending students:

Project work and oral exam:
- Project work to apply the Lean Startup methodology in a startup project (70% of the mark, team score);
- Oral exam to test the understanding of theories and knowledge application skills, and verification of project results (30% of the mark, individual score).

Note: Positive project result is necessary to attend the oral exam. Both parts of results must be positive to pass the exam. In case of a positive mark, the project will count for all 3 regular exam sessions.

**Required readings**

Other reading materials be published in the course websites.

Subject Librarian: David Gebhardi, [David.Gebhardi@unibz.it](mailto:David.Gebhardi@unibz.it)

**Supplementary readings**
Will be published on the course website.

**Software used**
Will be decided by the project teams.
