<td><a href="https://ole.unibz.it/">https://ole.unibz.it/</a></td>
</tr>
<tr>
<td>SPECIFIC EDUCATIONAL OBJECTIVES</td>
<td>Type of course: “di base” for L-31</td>
</tr>
<tr>
<td></td>
<td>Scientific area: “Formazione informatica di base” for L-31</td>
</tr>
<tr>
<td></td>
<td>The aim of this course is to introduce fundamental topics of mathematics that are in support of computer science. In particular, the course will to introduce students to the following topics: 1) sequences and series; 2) univariate functions; 3) derivatives, differentials and Taylor theorem; 4) Riemann integral; 5) logarithmic and exponential functions; and 6) normed vector spaces.</td>
</tr>
<tr>
<td>LECTURER</td>
<td>Ognjen Savkovic</td>

### OFFICE HOURS
Friday 14:00-16:00, It is recommended to make an appointment beforehand by email. Ognjen.Savkovic@unibz.it, office POS 2.02, Faculty of Computer Science, Piazza Domenicani 3

### TEACHING ASSISTANT
Ognjen Savkovic, Paola Lecca

### OFFICE HOURS
Tuesday 15-16, Paola.lecca@unibz.it Office POS 1.04, Faculty of Computer Science, Piazza Domenicani 3

### LIST OF TOPICS COVERED
- Sequences and series
- Univariate functions
- Limits of functions and continuity
- Derivatives, differentials and Taylor Theorem
- Riemann integral
- Logarithmic and exponential functions

### TEACHING FORMAT
This course will be delivered through a combination of formal lectures and exercises

### LEARNING OUTCOMES

**Knowledge and understanding**
- Have a solid knowledge of mathematical analysis that are in support of computer science.

**Applying knowledge and understanding**
- Be able to use the tools of mathematics to solve problems.

**Making judgments**
- Be able to work autonomously according to the own level of knowledge and understanding.

**Communication skills**
- Be able to use one of the three languages English, Italian and German, and be able to use technical terms and communication appropriately.

**Ability to learn**
Have developed learning capabilities to pursue further studies with a high degree of autonomy.

### ASSESSMENT
The written exam will consist of a set of verification questions, transfer of knowledge questions and exercises. The aim of the assessment is to check to which degree students have mastered the following learning outcomes: 1) knowledge and understanding, 2) applying knowledge and understanding, 3) making judgment.

This holds for both attending and non-attending students.

### ASSESSMENT LANGUAGE
English
### EVALUATION CRITERIA AND CRITERIA FOR AWARDING MARKS

Final Written Exam, 100% covering the full program. Written exam questions will be evaluated in terms of correctness, clarity, quality of argumentation, problem solving ability.

### REQUIRED READINGS

Students should refer primarily to their notes taken in class (lectures and exercise classes) and consult the following textbook:

- **Title**: Real analysis
  - **Author**: John M. Howie
  - **ISBN**: 978-1-4471-0341-7

### SUPPLEMENTARY READINGS

- **Title**: Calculus: A Complete Course
  - **Author**: Robert A Adams
  - **ISBN**: 0-321-27000-2

### SOFTWARE USED

No software used
