

## Syllabus

### Course description

<b>Course title</b>	Project, Process and Technology Management
<b>Course code</b>	47540
<b>Scientific sector</b>	ING-IND/17, ING-IND/35
<b>Degree</b>	Master
<b>Semester</b>	1
<b>Year</b>	1
<b>Academic Year</b>	2023-2024
<b>Credits</b>	10
<b>Modular</b>	Yes

<b>Total lecturing hours</b>	28+28
<b>Total lab hours</b>	
<b>Total exercise hours</b>	18+18
<b>Attendance</b>	Recommended
<b>Prerequisites</b>	None
<b>Course page</b>	<a href="https://www.unibz.it/en/faculties/engineering/master-industrial-mechanical-engineering/">https://www.unibz.it/en/faculties/engineering/master-industrial-mechanical-engineering/</a>

<b>Specific educational objectives</b>	<p>The course is one of the basics of the scientific area of Industrial Engineering.</p> <p>The course gives a general overview of the main scientific contents. During the course, the presented theoretical topics will be integrated through targeted application-oriented exercises and through a real game-based business simulation.</p> <p>The learning objectives of module 1 are to introduce engineering students in the fundamentals of project management. Specifically, it will deal with the subjects of project planning, project scheduling and project monitoring.</p> <p>The learning objectives of module 2 are to introduce students to the fundamentals of process and technology management. In particular, the part that concerns the process management will deal with process identification, modelling and redesign and the part that concerns the technology management will deal with technology foresight and related methods.</p>
--	---

<b>Module 1</b>	Project Management
<b>Lecturer</b>	Dr. Ing. Patrick Dallasega
<b>Scientific sector of the lecturer</b>	ING-IND/17
<b>Teaching language</b>	English
<b>Office hours</b>	See on timetable
<b>Teaching assistant (if any)</b>	Andrea Revolti

<b>Office hours</b>	See on timetable
<b>List of topics covered</b>	<ol style="list-style-type: none"> <li><b>1. Introduction to Project Management</b></li> <li><b>2. Project planning</b> <ol style="list-style-type: none"> <li>a) The Work Breakdown Structure (WBS)</li> <li>b) The Organizational Breakdown Structure (OBS)</li> <li>c) Planning of resources</li> </ol> </li> <li><b>3. Project scheduling methods</b> <ol style="list-style-type: none"> <li>a) Network diagram techniques (AOA, AON)</li> <li>b) The Critical Path Method (CPM)</li> <li>c) The Program Evaluation Review Technique (PERT)</li> <li>d) Project Crashing</li> <li>e) Resource allocation</li> </ol> </li> <li><b>4. Project progress measurement and forecast</b> <ol style="list-style-type: none"> <li>a) Progress measurement</li> <li>b) The Earned Value Analysis (EVA)</li> <li>c) The Earned Value Performance Measurement (EVPM)</li> </ol> </li> <li><b>5. Project risk management</b> <ol style="list-style-type: none"> <li>a) Methodologies for project risk identification</li> <li>b) Methodologies for project risk evaluation</li> </ol> </li> <li><b>6. Construction Project Management</b> <ol style="list-style-type: none"> <li>a) The Last Planner System (LPS)</li> <li>b) The Location Based Management System (LBMS)</li> </ol> </li> <li><b>7. Exercises</b> <ol style="list-style-type: none"> <li>a) Exercises on AOA, AON</li> <li>b) Exercises on CPM, PERT, project crashing, resource allocation</li> <li>c) Exercises on EVA</li> <li>d) Exercises using Microsoft Project</li> <li>e) Last Planner Simulation game</li> <li>f) Excursion to local companies to provide practical illustrations of project management processes</li> </ol> </li> </ol>
<b>Teaching format</b>	Frontal lectures and exercises in class (laptops are required for some lectures and exercises)

<b>Module 2</b>	Process and Technology Management
<b>Lecturer</b>	Prof. Guido Orzes
<b>Scientific sector of the lecturer</b>	ING-IND/35
<b>Teaching language</b>	English
<b>Office hours</b>	By email appointment
<b>Teaching assistant (<i>if any</i>)</b>	Bais Beatrice
<b>Office hours</b>	-
<b>List of topics covered</b>	<ol style="list-style-type: none"> <li><b>1. Process management</b> <ol style="list-style-type: none"> <li>a) Introduction to business process management</li> <li>b) Process identification and description</li> <li>c) Process modelling (Business Process Model and</li> </ol> </li> </ol>

	<p>Notation - BPMN)</p> <p>d) Process discovery e) Process analysis f) Process redesign</p> <p>Exercises:</p> <ul style="list-style-type: none"> <li>• Exercises on process modelling using the BPMN software BIZAGI</li> <li>• Case study (process modelling and redesign)</li> </ul> <p><b>2. Technology management</b></p> <p>a) Introduction to technology management b) Technology management activities: acquisition, exploitation, identification, protection, selection c) Technology management tools: portfolio management, patent analysis, value analysis, stage-gate, S-curve, technology roadmapping</p> <p>Exercises on technology management</p>
<b>Teaching format</b>	Frontal lectures and exercises in class (laptops are required for some exercises)

<b>Learning outcomes</b>	<p><b>Intended Learning Outcomes (ILO)</b></p> <p><b>Module 1</b></p> <p><u>Knowledge and understanding</u></p> <ol style="list-style-type: none"> <li>1. The students know the basic and most common methodologies of Project Management (Planning, Scheduling and Monitoring) and the main used tools.</li> <li>2. The students are able to understand the issues relating to the development, implementation and management of production and logistics systems;</li> </ol> <p><u>Applying knowledge and understanding</u></p> <ol style="list-style-type: none"> <li>3. Students will be able to apply theoretical concepts of planning, organizing and managing projects.</li> <li>4. By means of exercises performed in the computer laboratory, the student will be able to use software tools like Microsoft Project, which is one of the most used tools of local companies.</li> </ol> <p><u>Making judgements</u></p> <ol style="list-style-type: none"> <li>5. The students are able to interpret Key Performance Indicators of project management to understand if projects are over, under or on budget and time.</li> </ol>
--------------------------	--

Communication skills

6. Ability to structure and prepare a presentation describing project management concepts with business language

Ability to learn

7. Ability to autonomously extend the knowledge acquired during the study course in different industrial contexts

**Module 2**

Knowledge and understanding

- 8. The students will understand the issues related to the process identification, modelling and redesign and will know the basic and most common methods used in process management
- 9. The students will know various methods used for the technology management and foresight
- 10. The students will understand how firms can rely on external collaboration to innovate

Applying knowledge and understanding

- 11. Students will be able to apply theoretical concepts of process management and to use BPMN tools for the process description and modelling
- 12. Students will learn how to apply theoretical models of technology foresight and to implement complex technology foresight methods like T-start and scenario planning

Making judgments

- 13. Students will be able to transfer the knowledge and methods learned to real practical applications
- 14. Students will be able to describe processes in a way that allows to find their criticalities and to redesign them
- 15. Students will be able to recognize consciously the technological positioning of a company and to find options for its development and improvement, using technology foresight

Communication skills

16. Students will be able to present process analyses and

	<p>technology roadmaps</p> <p>17. Students will be able to interact in a competent and professional way in complex, multi-participants workshops like the ones used in T-plan and scenario planning methods</p> <p><u>Ability to learn</u></p> <p>18. Students will be able to autonomously extend the knowledge acquired during the study course by reading and understanding</p>

<b>Assessment</b>	<p><b>Module1</b></p> <table border="1"> <thead> <tr> <th>Form</th> <th>Length /duration</th> <th>ILOs assessed</th> </tr> </thead> <tbody> <tr> <td>Written exam</td> <td>1,5 hours</td> <td>1,2,3,4,5</td> </tr> <tr> <td>Presentation case study</td> <td>15 minutes per student group</td> <td>5,6,7</td> </tr> </tbody> </table> <p><b>Module 2</b></p> <table border="1"> <thead> <tr> <th>Form</th> <th>Length /duration</th> <th>ILOs assessed</th> </tr> </thead> <tbody> <tr> <td>Written exam</td> <td>1,5 hours</td> <td>8-18</td> </tr> <tr> <td>Case study (modelling and re-design)</td> <td>BPMN models + 1 page report</td> <td>8, 11, 13, 18</td> </tr> </tbody> </table>	Form	Length /duration	ILOs assessed	Written exam	1,5 hours	1,2,3,4,5	Presentation case study	15 minutes per student group	5,6,7	Form	Length /duration	ILOs assessed	Written exam	1,5 hours	8-18	Case study (modelling and re-design)	BPMN models + 1 page report	8, 11, 13, 18
Form	Length /duration	ILOs assessed																	
Written exam	1,5 hours	1,2,3,4,5																	
Presentation case study	15 minutes per student group	5,6,7																	
Form	Length /duration	ILOs assessed																	
Written exam	1,5 hours	8-18																	
Case study (modelling and re-design)	BPMN models + 1 page report	8, 11, 13, 18																	
<b>Assessment language</b>	English																		
<b>Evaluation criteria and criteria for awarding marks</b>	<p>Project Management – Module 1: The grade is calculated from the results of the written exam and the case study (exercise part). The theoretical part counts 50% and the exercise part counts 50% of the final grade.</p> <p>Process and Technology Management – Module 2: The grade is based on a written exam with exercises and theoretical questions and on a case study (on process modelling and re-design). The written exam counts 80%, and the case study (modelling and re-design) 20% of the final grade.</p> <p>The assessment is based on ability to solve exercises about the topics of the course (process mapping and re-organization and technology roadmapping), clarity of answers, mastery of language (also with respect to teaching language), ability to summarize and establish relationships between topics.</p> <p>Final grade: Average of Module 1 and Module 2.</p>																		

<b>Required readings</b>	Lecture notes and documents for exercises will be available on Microsoft Teams, Reserve Collections and the
--------------------------	---

	Open Learning Environment (OLE).
