

Syllabus Course description

Course title:	Information and communication technology for social education
Course year:	3rd
Semester:	2nd
Course code:	64188
Scientific sector:	M-PED/03
Lecturer:	Colombi Alessandro
Module:	no
Lecturer other module:	1
Credits:	2
Total lecturing hours:	15
Total Hours of availability for students and tutoring:	6
Office hours:	from Monday to Friday on request
	, , , , , , , , , , , , , , , , , , , ,
Attendance:	according to the regulation
Teaching language:	English
Propaedeutic course:	none
•	
Course description:	The course aims at the acquisition of the theoretical- practical foundations of ICT, focusing specifically on the main applications, both at the level of tools and services, and their direct/indirect implications related to educational interventions in the social sphere.
Specific educational objectives:	Description - ICT and learning technologies for educators - Digital tools and services for/to manage social intervention
	The course aims at the development of specific practical and management skills, thus related both to the design and modulation of educational interventions and to their management, proposal, documentation.
	knowledge of the most diffused digital tools and services analysis of basic digital production tools analysis of digital management resources and services analysis and application of presentation tools, local/online analysis of tools and templates for projects' presentation/documentation and/or interventions related to digital tools/services integration.
List of topics covered:	Basic tools and practices Productivity tools and general duties Off and Online presentation tools Off and Online management tools Social and IC tools
Teaching format:	Frontal teaching, practical activities carried out directly in the classroom.
Languing autorises	Disciplinary, akilla
Learning outcomes:	Disciplinary skills

Knowledge of the main digital content tools and development systems Knowledge and understanding of applications and implications of integrating digital tools into professional practice. Knowledge of digitally derived presentation and documentation systems Introduction to the use of digital management and organisation systems Transversal/soft skills Critical skills and skills for selecting sources and content for use in different areas, both in professional and research contexts. Competences related to the choice of specific digital tools and resources for different purposes. Competences related to access and inclusion parameters of digital content and tools. Critical skills and skills for selecting sources and content for use in different areas, both in professional and research contexts. Competences related to the choice of specific digital tools and resources for different purposes. Competences related to the choice of specific digital tools and resources for different purposes. Competences related to access and inclusion parameters of digital content and tools. Communication skills Ability to share what has been learnt with various interlocutors and through multiple approaches and modalities. Ability to learn and develop acquired competences autonomously, also in the direction of an approach aware

autonomously, also in the direction of an approach aware
of the need for their constant updating.
Assessment: The achievement of the learning objectives is assessed by
means of the following examination methods:
- Intermediate assessments carried out through the
publication of critical texts and comments on the course
platform Final written essay and related discussion interview
Tinal written essay and related discussion interview
Evaluation criteria and criteria for Attribution of a single final grade.
awarding marks:
In intermediate assessments and linked to the
development of written comments and considerations on the platform, the following are assessed: relevance, logical
structure, clarity of argument, formal correctness.
Structure, startly of digament, formula confeculess.
For the final essay, the previous approach applies, while for
the interview the following will be assessed: relevance,
clarity of argument, critical analysis capacity, ability to
rework, reflection.

Required readings:	Digital Citizenship Education. (2017). Francia: Council of
Supplementary readings:	Europe. DigComp: The European Digital Competence
	Framework. (2018). Lussemburgo: Publications Office of the European Union.
