

University Academic Curriculum Vitae

Personal information Lorenzo Giovannini

Education since leaving school

- 2004: Bachelor degree in Environmental and Land Engineering, University of Trento, Italy
- 2008: Master degree in Environmental and Land Engineering, University of Trento, Italy
- 2012, PhD in Environmental Engineering, University of Trento, Italy

Present appointment

- Associate professor (from June 2022), University of Trento

Professional experience

From / to	Job title	Name of academic Institution
06/2019-06/2022	Assistant professor (RTD-b)	University of Trento
02/2017-06/2019	Assistant professor (RTD-a)	University of Trento
08/2012-01/2017	Post-doc researcher	University of Trento

Experience in academic teaching (last five years)

- **Academic Year 2023-2024**
 - Atmospheric Physics and Modelling, Master in Environmental and Land Engineering, University of Trento (main responsible - 60 h)
 - Renewable Energy and Meteorology, Master in Energy Engineering, University of Trento (main responsible - 60 h, upcoming semester)
 - Atmospheric Boundary Layer and Turbulence, Master in Environmental Meteorology, University of Trento (20 h, upcoming semester)
 - Numerical Modelling of Weather and Climate, Doctoral School in Civil, Environmental and Mechanical Engineering, University of Trento (main responsible - 21 h, upcoming semester)
 - Turbulence in environmental flows, Doctoral School in Civil, Environmental and Mechanical Engineering, University of Trento (10 h, upcoming semester)
- **Academic Year 2022-2023**
 - Atmospheric Physics and Modelling, Master in Environmental and Land Engineering, University of Trento (main responsible - 60 h)
 - Renewable Energy and Meteorology, Master in Energy Engineering, University of Trento (main responsible - 60 h)
 - Atmospheric Boundary Layer and Turbulence, Master in Environmental Meteorology, University of Trento (20 h)
 - Numerical Modelling of Weather and Climate, Doctoral School in Civil, Environmental and Mechanical Engineering, University of Trento (main responsible - 21 h)
 - Turbulence in environmental flows, Doctoral School in Civil, Environmental and Mechanical Engineering, University of Trento (10 h)
- **Academic Year 2021-2022**
 - Physics of the Atmosphere and of the Climate, Master in Environmental and Land Engineering, University of Trento (main responsible - 60 h)

- Renewable Energy and Meteorology, Master in Energy Engineering, University of Trento (main responsible - 60 h)
- Atmospheric Boundary Layer and Turbulence, Master in Environmental Meteorology, University of Trento (20 h)
- Numerical Modelling of Weather and Climate, Doctoral School in Civil, Environmental and Mechanical Engineering, University of Trento (main responsible - 15 h)
- Understanding turbulence dynamics by simulations and measurements, Doctoral School in Civil, Environmental and Mechanical Engineering, University of Trento (6 h)
- **Academic Year 2020-2021**
 - Physics of the Atmosphere and of the Climate, Master in Environmental and Land Engineering, University of Trento (main responsible - 60 h).
 - Renewable Energy and Meteorology, Master in Energy Engineering, University of Trento (main responsible - 45 h).
 - Atmospheric Boundary Layer and Turbulence, Master in Environmental Meteorology, University of Trento (19 h).
 - Numerical Modelling of Weather and Climate, Doctoral School in Civil, Environmental and Mechanical Engineering, University of Trento (main responsible - 15 h)
- **Academic Year 2019-2020**
 - Physics of the Atmosphere and of the Climate, Master in Environmental and Land Engineering, University of Trento (main responsible - 40 h).
 - Air Pollution Modeling, Master in Environmental Meteorology, University of Trento (40 h).
 - Fundamentals of Meteorology and Climatology, Bachelor in Environmental and Land Engineering, University of Trento (16 h).
- **Postgraduate supervision (PhD level):** supervision of 8 PhD students in the last five years.

Other academic responsibilities

- 2021-today: academic tutor for the master in Energy Engineering
- 2019-today: academic tutor for the master in Environmental Meteorology
- 2018-today: representative of the University of Trento in the working group "Climate Change" of the Network of Universities for Sustainable Development.
- 2017-today: member of the Department Council of the Department of Civil, Environmental and Mechanical Engineering of the University of Trento
- 2017-today: member of the Doctoral School Committee of the Doctoral Programme in Civil, Environmental and Mechanical Engineering of the University of Trento
- 2013-2015: elected representative of post-doc researchers in the Department Council of the Department of Civil, Environmental and Mechanical Engineering of the University of Trento

Editorial activity

- Associate editor for the international journal Meteorological Applications of the Royal Meteorological Society
- Guest editor of the special issue "Atmospheric processes and applications in urban, coastal and mountainous terrain" for Meteorological Applications

Conference organization	<ul style="list-style-type: none"> Scientific committee of the 4th National Conference of the Italian Association for Atmospheric Sciences and Meteorology (AISAM), Milano, 15-19 February 2022 (http://congressoaisam.eu/index.html) Scientific committee of the 35th International Conference on Alpine Meteorology, Riva del Garda, 2-6 September 2019 (www.icam2019.it) Organizing committee of the Festivalmeteorologia: <ul style="list-style-type: none"> 1st edition: Rovereto, 16-17 October 2015 2nd edition: Rovereto, 11-12 November 2016 3rd edition: Rovereto, 17-19 November 2017 4th edition: Rovereto, 16-18 November 2018 5th edition: Rovereto, 15-17 November 2019 																									
International committees	<ul style="list-style-type: none"> Leader of the Working Group "Surface-Atmosphere Exchange" of the TEAMx international programme (http://www.teamx-programme.org/) Leader of the Task Team "Thermally-driven Winds and Transport" of the Mountain Boundary Layer Working Group of the TEAMx international programme (http://www.teamx-programme.org/) 																									
Research interests	<ul style="list-style-type: none"> Main areas of research <ul style="list-style-type: none"> Urban meteorology: analysis of urban phenomena with experimental campaigns and numerical modelling. Development of urban parameterizations for mesoscale meteorological models Mountain meteorology: analysis of atmospheric processes typical of mountain areas by means of both data analysis and numerical modelling Atmospheric numerical modelling: experience in running high-resolution simulations with the WRF model in urban areas and complex terrain. Responsible for an operational forecasting system at 1 km resolution for South Tyrol and Trentino based on the WRF model (https://meteo.unitn.it) 																									
Projects	<ul style="list-style-type: none"> Research grants and projects (last 5 years)

 1. Todeschini I., G. Antonacci, A. Bisignano, L. Giovannini, R. Cavaliere, 2020: A modelling chain for establishing a low emission corridor through the Alps. HARMO 2020 - 20th International Conference on Harmonisation within Atmospheric Dispersion Modelling for Regulatory Purposes, Proceedings.
 2. Pappaccogli G., L. Giovannini, F. Cappelletti, D. Zardi, 2017: Sensitivity of WRF/urban simulations to urban morphology parameters: A case study in the city of Bolzano. Building Simulation Applications, Volume 2017- February, 433-440.
 3. Tomasi E., G. Antonacci, L. Giovannini, M. Falocchi, S.

- Alessandrini, E. Ferrero, D. Zardi, 2017: The Bolzano tracer experiment (BTEX): An experiment on tracer gas dispersion from an incinerator stack and on its real-time modelling. HARMO 2017 - 18th International Conference on Harmonisation within Atmospheric Dispersion Modelling for Regulatory Purposes, Proceedings, Volume 2017-October, 141-145.
4. Tomasi E., L. Giovannini, P. Jiménez, B. Kosovic, S. Alessandrini, E. Ferrero, M. Falocchi, D. Zardi, L. Delle Monache, 2017: A 3D planet boundary layer scheme for the representation of dispersion processes in subkilometer horizontally non-homogeneous flows. HARMO 2017 - 18th International Conference on Harmonisation within Atmospheric Dispersion Modelling for Regulatory Purposes, Proceedings, Volume 2017-October, 421-425.
 5. Tomasi E., L. Giovannini, M. Falocchi, D. Zardi, G. Antonacci, 2016: Preliminary pollutant dispersion modelling with calmet and calpuff over complex terrain in the Bolzano Basin (IT). HARMO 2016 - 17th International Conference on Harmonisation within Atmospheric Dispersion Modelling for Regulatory Purposes, Proceedings, Volume 2016-May, 160-164.
 6. Tomasi E., G. Antonacci, L. Giovannini, D. Zardi, M. Ragazzi, 2015: Atmospheric dispersion modelling with AERMOD for comparative impact assessment of different pollutant emission sources in an Alpine valley. WIT Transactions on Ecology and the Environment, 198, 431-442, doi:10.2495/AIR150371.
 7. Giovannini L., G. Antonacci, D. Zardi, L. Laiti, L. Panziera, 2014: Sensitivity of simulated wind speed to spatial resolution over complex terrain. Energy Procedia, 59C, 323-329, <https://doi.org/10.1016/j.egypro.2014.10.384>.
 8. Laiti L., D. Andreis, F. Zottele, L. Giovannini, L. Panziera, G. Toller, D. Zardi, 2014: A solar atlas for the Trentino region in the Alps: quality control of surface radiation data. Energy Procedia, 59C, 336-343, <https://doi.org/10.1016/j.egypro.2014.10.386>.

Invited conference talks

- Giovannini L., D. Zardi, M. Falocchi, W. Tirler, E. Tomasi, E. Ferrero, S. Alessandrini, P. Jiménez, B. Kosovic, L. Delle Monache, G. Antonacci: Measurement and modeling of pollutant dispersion in highly complex terrain: the Bolzano tracer experiment (BTEX). Meteorology and Climate - Modeling for Air Quality Conference (MAC-MAQ), 14-17 September 2021, Virtual.
- Giovannini L., E. Tomasi, M. Falocchi, G. Antonacci, W. Tirler, D. Zardi: A tracer experiment to validate air pollution dispersion models for the characterization of the environmental impact of a waste-to-energy plant in an Alpine valley. Venice 2020 - 8 Symposium on Energy from Biomass and Waste, 16-19 November 2020, Virtual.

Invited seminars

- "Extreme precipitation events over the eastern Italian Alps: role of large-scale forcing and local orography", Seminar Series: Exchange of Recent Research in Atmospheric Sciences, organized by the Goethe University Frankfurt (Germany) and the Universidad Nacional de Colombia, Medellín, 24 March 2022 (online).
- "Cities, energy consumption and urban heat island mitigation", Department of Atmospheric and Cryospheric Sciences, University of Innsbruck, Austria, 29 January 2020.
- "Previsioni casa per casa: la meteorologia a scala urbana nelle città", Accademia di Agricoltura Scienze e Lettere di Verona, Verona, 1 Dicembre 2017.
- "Numerical weather predictions over complex terrain", Institute of

- Urban Meteorology, Beijing, 18 October 2017.
- "An investigation of the Ora del Garda wind in the Alps from surface and airborne measurements and from high-resolution numerical simulations", ISAC-CNR, Bologna, 26 February 2016.
 - "Come valutare con un modello meteorologico gli effetti sul microclima derivanti da cambiamenti d'uso del suolo: un caso studio in Trentino", University of Palermo, Department of Agricultural and Forest Sciences, Palermo, 12 June 2015.
