## **ATTIVITÀ SCIENTIFICA (dal 2015)**

### **Ricercatore (RTD A) – Bolzano (da giugno 2018)**

L'attuale ricerca riguarda lo studio e applicazione di approcci innovativi per la caratterizzazione della composizione molecolare e macro-molecolare di vini regionali. Gli studi più recenti riguardano una classe di composti tanninici condensati macro-ciclici con promettenti applicazioni nella tecnologia enologica e in studi di autenticità.

### **Assegnista di ricerca - Bolzano (2015-2018)**

La ricerca ha coinvolto lo studio della composizione chimica (prevalentemente grassi e composti fenolici) in matrici alimentari mediante tecniche di cromatografia accoppiata a spettrometria di massa ad alta risoluzione.

### **PROGETTI DI RICERCA (dal 2018)**

Coinvolto in vari progetti di ricerca nell'ambito del laboratorio di Enologia dell'Università di Bolzano (Oenolab), inerenti lo studio della composizione del vino in relazione alle tecniche impiegate in enologia, ai materiali utilizzati per la conservazione ed all'origine geografica, nonché alla relazione tra le variabili chimiche e le proprietà sensoriali.

Responsabile del progetto c-PAC (finanziato dall'Università di Bolzano – 15000 euro), che prevede la messa a punto di protocolli di isolamento e caratterizzazione di composti tanninici macrociclici per lo studio della loro applicazione come additivi enologici.
