## Research and scholarships

In my career I have cultivated several research interests, which mostly fall under the umbrella of empirical software engineering and software developer productivity. These include:

- Recommender systems for software developers
- Empirical studies of software developer's behavior
- Empirical studies of programming language feature usage, and their impact on developer productivity
- Empirical studies of the usage of APIs by developers and its evolution over time
- Software engineering for robotics
- Large-scale and fine-grained Mining Software Repositories to support empirical studies such as the above
- Studies of software engineering practices in small software companies, and their needs for software analytics

## Significant achievements in research and scholarship

- My Ph.D thesis ("Of Change and Software"), in which I explore the usefulness of representing change as first class citizens, was a major influence on the Ph.D theses of Peter Ebraert, Lile Hattori, Stas Negara, Quinten Soetens, Takayuki Omori, and Martin Dias. My Ph.D. thesis was also a finalist of the GI-Dissertationspreis (a competition of Ph.D.s awarded in Germany, Austria, and Switzerland) in 2010.
- As part of this thesis, my ASE 2008 paper was selected as one of 3 papers for the special issue of the conference. ASE is a top SE conference, which had 280 submissions and a 12% acceptance rate for full papers that year, placing my paper in the top 1% of submitted papers to ASE 2008.
- My MSR 2010 paper was the top-cited paper in the period 2010-2015 according to google scholar. It's EMSE extension is the most cited paper of the last 5 years (<http://goo.gl/v1fZAg>)
- Papers I co-authored received two best paper awards (WCRE 2009, MSR 2011). In addition, several of my papers were best paper award candidates and were invited to special issues as a consequence. Other indicators of the quality of my works are the number of publications in top-tier conferences (12) and top-tier journals (8)
- I was nominated by my department to the Microsoft Faculty Fellows in 2012, and was a finalist for that award.
