

Federica Morandi

University Academic Curriculum Vitae

Education since leaving school

- **PhD in Energy, Nuclear and Environmental Control Engineering, 28th cycle, University of Bologna, 2016**
Supervisor: Prof. Massimo Garai
SSD: ING/IND-11
Thesis title: “Theoretical and experimental investigation into stop-band properties of sonic crystals”. Evaluation: Excellent.
- **Master’s degree in Architecture and Building Engineering (European Standard 4/S), University of Bologna, 2012**
Advisor: Prof. Massimo Garai
Thesis title: “Acoustical characterization and study of sound radiation from stages: a comparison between the theatres of Cesenatico and Longiano”. Grade: 110/110 with honors.
- National professional practice examination in Civil and Environmental Engineering (sez. A), 2012.

Present appointment

Fixed-term contract researcher (RTDa) at the Faculty of Engineering, Free University of Bozen-Bolzano
Period: 01.02.2025 – present
Supervisor: Prof. Andrea Gasparella
SSD: ING/IND-11
Project: Theoretical and experimental analysis of interactions between the built environment and users to support energy efficiency policies and the improvement of living and working conditions in buildings and urban centres.

Professional experience

- **Fixed-term contract resesarcher (RTDa) at the Faculty of Engineering, Free University of Bozen-Bolzano**
Period: 01.01.2022 – 31.12.2024
Supervisor: Prof. Andrea Gasparella
SSD: ING/IND-11
Project: FOREST (RTD PON, DM1062/2021): “FOstering Research and Ecological Solutions for (green) Transition”.
Activities: Analysis of the involvement of companies in the wood supply chain with respect to the implementation of measures finalized at the SDGs. Definition and mapping of KPIs (triple bottom line) to target green transition at the supply chain level, accounting for the specific needs of the different players and their relative improvement. Identification of technological solutions enabling the reduction of barriers and promoting the diffusion of

timber construction. Investigation on occupants' behaviour as a measure to restore comfort in a multi-domain approach and its impact on energy efficiency.

- **Research Assistant at the Faculty of Science and Technology, Free University of Bozen-Bolzano**

Period: 01.06.2020 – 31.12.2021

Supervisor: Prof. Andrea Gasparella

SSD: ING/IND-11

Project: BIGWOOD (INTERREG V-A Italia-Austria, ID ITAT1375): "Reduction of barriers and prejudices on multi-storey wooden buildings through the creation of design awareness".

Activities: Management of WP3 "Creating an environment for planning issues related to the process of large volume timber projects". Drafting of technical reports on the use of timber in construction, in collaboration with experts from companies from the sector (e.g., Xlam Dolomiti, LignoAlp, Rubner). Laboratory testing of sound insulation of lightweight timber walls and impact sound insulation of access floors on mass timber slabs - with the participation of Rotho Blaas, Liuni, Interface, Lombardini22. Analysis and case-study-based comparison of the Italian and Austrian legislative framework concerning energy efficiency of buildings, acoustic requirements, passive fire protection, and Life Cycle Assessment.

- **Research Assistant at the Faculty of Science and Technology, Free University of Bozen-Bolzano**

Period: 01.06.2019 – 31.05.2020

Supervisors: Prof. Andrea Gasparella, Prof. Giovanni Pernigotto

SSD: ING/IND-11

Project: E2I@NOI (FESR 2014-2020, ID 1095): "Definition of a system of laboratories for the development, characterization, and technology transfer for smart energy efficient buildings".

Activities: Analysis of Indoor Environmental Quality (thermal, visual, and acoustic comfort, indoor air quality) in university classrooms through the establishment of measurement protocols including (i) the collection of subjective votes and objective measures, and (ii) statistical analysis of in-domain and cross-domain correlations.

- **Research Assistant at the Department of Industrial Engineering, University of Bologna**

Period: 01.01.2016 – 31.05.2019

Supervisor: Prof. Luca Barbaresi

SSD: ING/IND-11

Project: Experimental analysis of flanking transmission on innovative junction systems for CLT panels.

Activities: Experimental characterization of vibration reduction indices for Cross Laminated Timber junctions with different

connection systems thorough lab measurements and on-site validation. Definition of empirical formulas to predict Kij.

Visiting research positions

- **Visiting Researcher at the Technische Universität München**
Period: 09.01.2023 – 01.02.2023
Supervisor: Prof. Bernhard Seeber
Activities: Development of psychoacoustic tests enabling users to undertake measures to optimize acoustic comfort and task-related performance.
- **Visiting research fellow at the University of Sherbrooke (Canada), 2018.**
Period: 15.09.2018 – 15.12.2018
Supervisor: Prof. Patrice Masson
Activities: Application of optimized Non-Destructive Testing (NDT) techniques for the detection of anomalous moisture content in timber elements.
- **Visiting PhD Student at the Open University (Milton Keynes, UK)**
Period: 01.09.2014 – 31.12.2014
Supervisors: Dr. Shahram Taherzadeh, Prof. Keith Attenborough
Activities: Implementation of semi-analytical methods to analyze the sound propagation in periodic media and validation by means of experimental measurements in the anechoic chamber.

Experience in academic teaching

Courses given in the 5 years at a national level

- AY 2023/2024. Course “Solar Energy Systems” (60 hours, EN), Master in Energy Engineering (LM-30), Free University of Bozen-Bolzano, University of Trento.
- AY 2023/2024. Course “Acoustic Design of Buildings” (30 hours, IT). Bachelor in Industrial and Mechanical Engineering (L9), Free University of Bozen-Bolzano.
- AY 2023/2024. Course “Building Design Concepts” (10 hours, IT), 1st level Master in Fire Safety Engineering, Free University of Bozen-Bolzano.
- AY 2023/2024. Course “High Performance Buildings – Comfort, Energy Efficiency” (30 hours, EN). Professional Bachelor in Wood Engineering (L9-wood), Free University of Bozen-Bolzano.
- AY 2022/2023. Course “Solar Energy Systems” (60 hours, EN), Master in Energy Engineering (LM-30), Free University of Bozen-Bolzano, University of Trento.
- AY 2022/2023. Course “Acoustic Design of Buildings” (30 hours, IT). Bachelor in Industrial and Mechanical Engineering (L9), Free University of Bozen-Bolzano.
- AY 2022/2023. Course “Building Design Concepts” (10 hours, IT), 1^o

level Master in Fire Safety Engineering, Free University of Bozen-Bolzano.

- AY 2020/2021. Course “High Performance Buildings – Comfort, Energy Efficiency” (50 hours, EN). Professional Bachelor in Wood Engineering (L9-wood), Free University of Bozen-Bolzano.
- AY 2019/2020. Course “High Performance Buildings – Comfort, Energy Efficiency” (50 hours, EN). Professional Bachelor in Wood Engineering (L9-wood), Free University of Bozen-Bolzano.

International teaching experiences

- 2023/2024: PI of the project “TIMBER – TIMber Buildings for Environmental Respite”, funded within the Euregio Mobility Funds. The project envisages a series of lectures targeted at university students in the field of high-performance timber construction, with reference to structural engineering, energy performance, acoustic design, and fire protection. Host and speaker of the full-day seminar “Sound insulation of timber buildings”. Project partners: University of Innsbruck (Prof. Roland Maderebner), University of Trento (Prof. Alessandro Prada, Prof. Ivan Giongo).
- Guest lecturer at the Postgraduate Diploma in “Diseño, Cálculo y Construcción de Estructuras en Madera”. Teaching (20 hours) and lab activities (10 hours) on the topic “Building Science and Envelope design”, Universidad ORT, Montevideo, Uruguay, June 2019. Invitation issued by Prof. Laura Moya.
- Guest lecturer at the Master in Timber Construction, Universidad del Bío-Bío, Concepción, Chile, within the course “Diseño y Cálculo de Estructuras en Madera”, held on 26-28 July 2017. Invitation issued by Prof. Cecilia Poblete Arredondo.

Teaching experience at PhD level

- Course on “Thermal Comfort for Automotive Applications” (9 hours) at the doctoral school in “Meccanica e Scienze Avanzate dell'Ingegneria” (DIMSAI) and “Automotive Engineering for Intelligent Mobility” (AEIM) of the School of Engineering at the University of Bologna, May 2024.

Students’ supervision

- Co-advisor/support of 2 PhD students
- Advisor of 7 bachelor’s degree thesis
- Co-advisor of 6 bachelor’s degree thesis and of 8 master’s degree thesis
- Academic tutor of 4 internships

Speaker in seminars or courses

Guest speakers at over 20 courses for professional boards, seminars or workshops at national and international level.

Other academic responsibilities

Institutional commitment

- AY 2022/2023, 2023/2024 and 2024/2025: Member of the Course Council of the 1st Level Master in Fire Safety Engineering, Free University of Bozen-Bolzano.
- AY 2022/2023, 2023/2024 and 2023/2025: Member of the Evaluation Committee for the students' admission to the 1^o level Master in Fire Safety Engineering.
- 2024: Member of the Space Assignment Committee for the transfer of the Faculty of Engineering to the new B1 Building at the NOI Techpark.
- Since February 2024: Student Tutoring for the Professional Bachelor in Wood Technologies (LP03).
- AY 2022/2023: Student Tutoring for internships for the Professional Bachelor in Wood Engineering (L9-wood).
- From 2022 to 2023: RTD representative at the Faculty of Science and Technology, Free University of Bozen-Bolzano. Coordination of inter-faculty initiatives aimed at promoting interpersonal contacts and at sharing experiences and best practices.
- Since 2022: Member of the Evaluation Committee for 17 contract lecturers, 27 teaching assistants and 6 research assistant positions.

Third mission

- 2025. Organization of the workshop "Design, built and test; exploring multistorey timber construction", within the unibz STEM school, February 2025 - with Prof. Francesco Patuzzi.
- 2025. Participation in the Open Day of the Faculty of Engineering with the activity "The sound of silence", January 2025, with Prof. Giovanni Pernigotto.
- From 2021 to 2025: Organization of thematic lectures in cooperation with the Advisory Board at unibz with students from technical institutes M.O.L Dal Cero (San Bonifacio, VR), IIS Palladio (Treviso), ISIS Fermo Solari (Tolmezzo, UD), Realgymnasium Bozens (Bolzano) and ITI Bazzi (Milano) – with Prof. Marco Baratieri, Prof. Francesco Patuzzi and Prof. Giovanni Pernigotto.
- From 2021 to 2024: Organization of activities at the Building Physics Labs at the NOI TechPark for high school students during the "Open day for schools" initiatives.
- 2023. Support to the initiative WoodPassage, promoted by the consortium ProRamus. Activities within the stand in Silvius

Magnago Square (Bozen) on 19.06.23 and awareness raising activities on the topic of sustainable wooden construction.

- From 2021 to 2023: Organization of meetings with local stakeholders to promote the Professional Bachelor in Wood Engineering (Xlam Dolomiti, Armalam, Nextwood, STP, Centro Consorzi, Consorzio Legno Veneto, ArCA, Wood Beton) – with Prof. Marco Baratieri and Prof. Francesco Patuzzi.
- AY 2022/2023: Organization of the series of lectures “La qualità dell’ambiente confinato e il relativo monitoraggio” (PCTO) for 5 classes of the high schools A. and P. Delai and G. Galilei of Bolzano (10 h) – with Prof. Giovanni Pernigotto and Prof. Andrea Gasparella.
- AY 2019/2020, 2020/2021 and 2021/2022: Organization of educational activities (PCTO) with the high school IIS Margherita Hack in Morlupo (Rome) – with Prof. Andrea Gasparella and Prof. Francesca Cappelletti (IUAV).

Memberships

Memberships in associations

- Member of *Associazione Italiana di Acustica (AIA)* since 2012.
- Member of *IBPSA Italy* since 2023.
- Member of *Associazione della Fisica Tecnica Italiana* since 2023.

Membership in organizing or scientific boards

- Member of the Organizing Committee of the event “nextFSE”, Italian forum on fire safety, held at the NOI Techpark on October 4th, 2024.
- Member of the Organizing Committee of the international seminar “Fire Safety in Timber Construction”, held on September 10th, 2024 at the NOI Techpark.
- Member of the Organizing Committee and of the Students Tutoring Scientific Committee at the Building Simulation Applications Conference 2024 (Bolzano, 26-28 June 2024).
- Member of the Organizing Committee and of the Students Tutoring Scientific Committee at the Building Simulation Applications Conference 2022 (Bolzano, 29 June-1 July 2022).
- Member of the Scientific Committee of the CLEM - Congreso Latinoamericano de Estructuras de Madera (Montevideo, 18-20 November 2019).
- Member of the Organizing Committee of the 8th International Symposium on Temporal Design (Bologna, 14-15 September 2017).
- 2017/2018: Manager of the technology transfer project “Proyectar, manufacturar y construir de forma sostenible con sistema de madera contralaminada - 17PDT-73489”, co-funded by

CORFO (Chilean government agency), granted to the University of Concepción (Chile) and co-executed by the University of Bologna and Rothoblaas GmbH. Coordination and teaching activities for courses and workshops related to high-performance timber construction.

Membership in international working groups

- 2024 – ongoing. Participation in the activities of IEA-EBC Annex 95 and Users TCP “Human-Centric Building Design and Operation for a Changing Climate”.
- 2023 – ongoing. Participation in the activities of IEA-EBC Annex 91 “Open BIM for Energy Efficient Buildings”.
- 2018 – 2023. Participation in the activities of IEA-EBC Annex 79 “Occupant-Centric Building Design and Operation”.

Editorial activities

- Topical advisory panel member of Applied Sciences in Environmental Sciences Section.
- Guest editor of the “Applied Sciences” special issue "Advances in High-Performance Buildings".
- Guest editor of the “Applied Sciences” special issue "Research on Structural Acoustics and Vibration".
- Reviewer for: *Building and Environment, Applied Acoustics, Indoor Air, European Journal of Wood and Wood Products, Journal of Architectural Engineering, Sensors, Building Acoustics, Acoustics, Acta Acustica.*

Research and scholarships

Current research activity

- *Multi-domain comfort*

Investigation on the interaction between different comfort domains (thermal, acoustical, visual and air quality) in educational buildings. Development of an integrated questionnaire and administration to university and high school students (1000+) to investigate sensation, preference, comfort, and satisfaction. Main focuses: (i) Analysis of in-domain and cross-domain correlations between objective measures and subjective response, (ii) determination of thresholds of specific environmental variables that determine different distribution of subjective responses in field experiments, (iii) determination of personal and contextual factors affecting in-domain and cross-domain relation between objective and subjective votes, (iv) evaluation of the relation between subjective scales, with specific focus on individual vs group ratings. Monitoring and modelling occupants’ behavior

concerning the interaction with the building envelope and the building energy systems in the short, mid, and long term. In collaboration with Purdue University (Prof. Athanasios Tzempelikos), IUAV University of Venice (Prof. Francesca Cappelletti), University of Trento (Prof. Alessandro Prada) and members of IEA-EBC Annex 79 [1, 3-4, 13-25].

- *Wearable sensors for the assessment of thermal comfort*

Experimental investigation on the use of wearable sensors to monitor skin temperature and predict thermal comfort under dynamic operating conditions. Use of thermal manikin to simulate heat exchanges in dry and sweating modes. In collaboration with professors from unibz (Prof. Michael Haller and Prof. Niko Münzenrieder).

Past research activity

- *Sound insulation of timber buildings*

Laboratory testing and modeling of sound insulation properties of lightweight timber structures (mass timber, timber frame). Characterization of vibration reduction indices for Cross Laminated Timber (CLT) junctions with different connection systems, including distributed and point connectors. Evaluation of the acoustic performance of resilient interlayers under different static loads and connection systems. Modelling of flanking transmission in mixed timber junctions and analysis of the applicability of the EN 12354 calculation method. In collaboration with CSTB (Dr. Catherine Guigou), University of Bologna (Prof. Massimo Garai, Prof. Luca Barbaresi), University of Padua (Prof. Antonino Di Bella), University of Ferrara (Prof. Patrizio Fausti) and CNR IBE (Dr. Andrea Polastri, Dr. Daniele Casagrande) [7, 12, 27-28, 32-39, 41-42].

- *Vibroacoustic analysis of timber elements*

Vibroacoustic analysis of CLT plates to gain understanding of (i) the transition from modal to diffuse vibrational field for modelling applications, (ii) the identification of the most suitable methods to measure dispersion relations in CLT plates, (iii) the determination of variability of dispersion curves of CLT plates related to a different composition of the constituent layers. Use of imaging techniques for the detection of water uptake in wood elements. In collaboration with University of Ferrara (Prof. Fausti), INRIM (Dr. Alessandro Schiavi and Dr. Andrea Prato), the University of Sherbrooke (Prof. Patrice Masson and Prof. Nicolas Quaegebeur) and the Hochschule Mittweida (Prof. Jorn Hübelt) [5-6, 26, 30-31].

- *Sonic crystal noise barriers*

Investigation on sound propagation through periodic arrays of scatterers to be used as noise barriers. Analytical and numerical investigation (Plane Wave Expansion method, Multiple Scattering

Theory and FEM analysis) on optimized lattices' configurations. Validation of the performance of the sonic crystal through experimental measurements (measurement protocol as in EN 1793-6 and in anechoic chamber) aimed at identifying respectively the standardized SI/RI indices and the insertion loss, with further quantification of the exponential decay of the sound field inside the array (evanescent modes). In collaboration with the University of Bologna (Prof. Massimo Garai, Prof. Alessandro Marzani) [9, 45, 48-49].

- *Acoustics of Historical Italian Opera Houses*

Measurement campaign on 11 Historical Italian Opera Houses aimed at studying common acoustic features and at verifying the consistency of the distribution of energy ratios across space in relation to the existing literature on performance spaces. Numerical simulations (hybrid virtual sources/ray tracing methods) of the sound field inside the theatres to refine the estimate of early reflections and to identify improvement measures for contemporary uses. Vibroacoustic analysis of the vaults to estimate risk damage related to the use of PA systems. Development of an envelope-based method to determine the early decay time from impulse responses and validation of its perceptual relevance against ISO 3382 criteria by means of listening tests. Analysis of the contribution of the sound radiation from historical wood stages and of their relevance for the listening experience of the audience and the musicians. In collaboration with the University of Bologna (Prof. Massimo Garai, Dr. Dario D'Orazio) [8, 10, 11, 40, 43-44, 46-47, 50].

Awards

- ICA-ASA-DEGA Young Scientist Conference Attendance Grant (Aachen, 2019).
- Best paper award at the 6th International Conference on Building Physics (Torino, 2015).
- Winner of the 1st edition of the UNIBO LaunchPad Program, the first Italian incubator of entrepreneurial ideas derived from academic research (2015) – with Eng. Simona De Cesaris.

Research contracts

- **RothoLATE** – “Sound insulation of timber construction elements”, funded by Rotho Blaas GmbH. PI: Prof. Andrea Gasparella. Period: Sep 2021 – Nov 2021. Contribution: Laboratory measurement of impact sound insulation of 3 mass timber flooring solutions.
- **RothoBridge** – “Analysis of thermal bridges for the connection between vertical walls and foundations in timber structures”,

funded by: Rotho Blaas GmbH. PI: Prof. Andrea Gasparella, CO-I: Prof. Giovanni Pernigotto. Period: Oct 2019 – Dec 2019. Contribution: Numerical assessment of the linear thermal transmittance according to the technical standard EN ISO 10211 and 2D FEM models for a set of construction details regarding the connection between vertical walls and foundations in timber buildings.

Further data

Presentation at scientific conferences over the past 5 years

- Internoise 2024, Nantes, 25-29.08.2024.
- Building Simulation Applications, Bolzano, 26-28.06.2024.
- ASHRAE Winter Conference, Chicago, 20-24.01.2024.
- Forum Acusticum 2023, Torino, 11-15.09.2023.
- Building Simulation Applications, Bolzano, 29.06-01.07.2022.
- IAQ ASHRAE Meeting, Athens, 4-6.05.2022.
- Euronoise Conference, Madeira (online), 25-27.10.2021.
- CLEM Conference, Montevideo, 18-20.11.2019.
- International Conference on Acoustics, Aachen, 9-13.09.2019.
- Building Simulation Applications, Bolzano, 19-21.06.2019.

Session chair at national and international conferences

- Chair of the session "Acoustics of Wooden Buildings" at Internoise 2024 (25-29 August 2024, Nantes) with Jean-Luc Kouyoumji.
- Chair of the session "A03-02 Sound insulation in wooden construction" at Forum Acusticum 2023 (Torino, 11-15 September 2023, Torino) with Stefan Schoenwald.
- Chair of the sessions "Acoustic Simulation" and "Acoustic Simulation II" at the BSA Conference (Bolzano, 29 June-1 July 2022) with Gino Iannace and Edoardo Alessio Piana respectively.
- Chair of the session "Sound Insulation of timber Buildings" at Euronoise 2021 (Madeira – held online, 25-27 October 2021) with Christian Simmons.
- Chair of the sessions "Arquitectura en madera e industrialización de la construcción" and "Estructuras de madera" at the CLEM conference (Montevideo, 18-20 November 2019).
- Chair of the session "Sound Insulation in Wooden Construction" at ICA 2019 (Aachen, 9-13 September 2019) with Berndt Zeitler.
- Chair or co-chair of structured sessions at national conferences on acoustics: AIA 2016, 2017, 2019, 2021.
