["Commutazione di codice nella lingua parlata: il caso del ladino, tedesco e italiano in Val Badia" cura di Augusto Carli, FrancoAngeli, Collana Educazione bilingue/20, 1999](#)

[ 1999 ]

**Reference:** a cura di Augusto Carli, FrancoAngeli, Collana Educazione bilingue/20, 1999

The research study deals with the phenomenon of code-switching within the oral speech of native Ladin speakers in Val badia. The languages involved in the code-switching are Ladin, German and Italian, as all these languages are used in everyday life of most of the speakers. The study regards 5 social domains (familiar, recreative, transactional, institutional, and professional), which were analyzed using audio registrations.

The study lasted about two years and gives a general review of the language use in the speech community.
