Faculty of Economics and Management

Competition Sector: 13/B4 (Economics of financial intermediaries and Corporate finance)

Disciplinary-scientific sector: SECS-P/09 (Corporate Finance)

Area of research or title of the research project: Financial conglomerates: restructuring and value creation

Research activity: Financial conglomerates operate under the universal banking model that consists of combining banking, insurance and securities businesses. These businesses are highly integrated and operate internationally. From a market valuation point of view, it is not clear whether financial conglomerates trade at premium or discount. On the one side, financial conglomerates could enjoy economies of scale and scope that boost performance and market valuations. On the other side, diversification of activities within a single financial conglomerate could intensify negative aspects of the organizational complexity and of the subsequent conflicts of interest with adverse implications on the market's valuation of the conglomerate. Previous research findings have shown that financial conglomerates traded at discount, unveiling the presence of agency problems and the failure of economies of scale and scope in financial intermediation to compensate for countervailing forces associated with diversification destroy value. The aim of the project is to investigate whether

operations of restructuring, such as M&As and divestitures, might be able to create value within financial conglomerates. In line with the research fields described by MIUR for the scientific sector SECS-P/09, the winner of the selection procedure should make valuable scientific contributions in the field of corporate finance, with a special focus on restructuring of financial conglomerates. In addition, the winning candidate should provide empirical contributions to the existing literature. The candidate should be able to conduct research autonomously. His/Her research results should be published in international journals.

Faculty of Economics and Management

Competition Sector: 12/A1 (Private Law)

Disciplinary-scientific sector: IUS/01 (Private Law)

Area of research or title of the research project: *The transfer of family wealth between private autonomy and mandatory regulation of succession law.*

The discipline of wealth transfer mortis causa has been traditionally regulated in a defined way by the law. Now private autonomy is gaining consensus. The study of this new approach is very interesting for the consequences that succession may have on the on the family based economic activities which are so common and widespread in our economic systems. The study will consider the current debate in other European countries and potentially also extra European. On the basis of the current law regulation of succession mortis causa the critical aspects of the limitation of private autonomy will be studied. The forbidden "patti successori" (art. 458 Italian c.c.) will be studied with the proposals for the reform of the current discipline; the protection of "legittimari" (art. 536 ss. Italian c.c.), i.e. the closest relatives of the de cuius, with the aim to evaluate if the actual family relationships environment in the current economic framework requires a redesign of the discipline; the "family pact" (patto di famiglia, art. 768 bis ss. Italian c.c.) institute and the reasons why it has been scarcely adopted in practice. On the current debate related to the reform of the mortis causa law a specific interest for the agricultural sector law has emerged as a potential source for comparison and basis for future redesign of the general discipline of the wealth transfer mortis causa (France for example). It is so considered useful the analysis of the specific regulation of the "maso chiuso" of the Provincial law of Bolzano and the relative experience. The research will focus on the juridical qualification of the private autonomy instances and on the balance between the patrimonial interest and the fundamental rights potentially involved. The research will be conducted in the European private law perspective which has now a specific EU Regulation of international private law of succession (Reg. 650/2012) and in nuce proposals for European common principles and harmonized rules.

Research activity: The research focuses on the above described topics and covers the following tasks

- analysis of the current law regulation of succession law for the transfer of family wealth
- study of the current debate
- study of the European Institutions initiatives
- research and analysis of the legal initiatives in other European countries (or also extra – European)
- creation of research reports and preparation of scientific papers
- presentation of the research results at national and international workshops and conferences.
