Approvata con decreto del preside della Facoltà di Scienze e Tecnologie informatiche n. 10/2018 del 12.04.2018

Genehmigt mit Dekret des Dekans der Fakultät für Informatik Nr. 10/2018 vom 12.04.2018

Riferimento / Kennziffer:

P04

Progetto di ricerca / Forschungsprojekt:

“TaDaQua - Tangible Data Quality with Object Signatures”

Descrizione dell'attività / Beschreibung der Tätigkeit:

“Development of a tool for faceted completeness profiling of Wikidata entities (ProWD).

The tool will allow one to define so-called CFA profiles that specify sets of Wikidata entities. A profile consists of (1) the classes of which the entities have to be instances, (2) facets, that is pairs of properties and values, that allow for the selection of subsets of entities, and (3) attributes, which are properties whose presence shall be profiled. Profiles can be created and analysed for completeness.

The system will be Web-based. The frontend consists of two pages, a start page where a user selects and existing profile or defines a new one, and a completeness analysis page where the user can explore a chosen profile. The backend will connect to Wikidata to analyse it with regard to the profile and the requests of the user, and store the query results to be analysed from the frontend.”
